

BI / read / 5

BI 1	query	BI / read / 5		
BI 2	title	Most active posters of a given topic		
BI 3	pattern			
BI 4	description	Get each Person (person) who has created a Message (message) with a given \$tag (direct relation, not transitive). Considering only these Messages, for each Person node: - Count its Messages (messageCount). - Count likes (likeCount) to its Messages. - Count Comments (replyCount) in reply to its Messages. The score is calculated according to the following formula: $1 \times \text{messageCount} + 2 \times \text{replyCount} + 10 \times \text{likeCount}$.		
BI 5	params	1	\$tag	Long String
BI 6	result	1	person.id	ID
BI 7		2	replyCount	32-bit Integer
BI 8		3	likeCount	32-bit Integer
BI 9		4	messageCount	32-bit Integer
BI 10		5	score	32-bit Integer
BI 11	sort	1	score	↓
BI 12		2	person.id	↑
BI 13	limit	100		
BI 14	CPs	1.2, 2.3, 2.6, 8.2
